

Training in Core Social Skills®

... in the Classroom

From our very popular AND successful Training in Core Social Skills® program for children and teens, comes a new program for educators to help all students become more informed, confident and skilled at interacting in a socially successful way!

Since beginning our Training in Core Social Skills® programs for children, parents and educators have seen significant gains in confidence and social interaction skills made by our program participants. So much so, schools have asked us to teach them how to use our methods with their entire class or student body.

We're now ready to offer these coaching strategies to those working with students in schools on a daily basis. Participants will learn proven hands-on methods for coaching children in Core Social Skills®, as well as how to integrate these methods into their daily language and classroom routines to benefit all their students and enhance the cooperative and collaborative environment of the classroom!

Who should attend?

Participants will include elementary school administrators, counsellors, special needs facilitators, teachers, educational assistants, recess and lunch supervisors, and anyone at your school who works with your students!

Timeline: Friday, January 26, 2018 – 9:00 a.m. to 4:30 p.m.

Cost: \$325 per participant (incl. light lunch & refreshments).

*10% discount for school groups of 3 or more people and those registered by Sept. 30, 2017.

Location: 15108-76 Ave., Edmonton (Rio Terrace Church).

Facilitator: Corinne Eckert, is a registered psychologist, director of Corinne Eckert Child & Adolescent Psychology and developer of the Training in Core Social Skills® program. As a former teacher, school counsellor and school behaviour specialist, Corinne has a wealth of experience helping teachers to facilitate positive behavior and emotional and social health in their students. Over the past 10 years, our Training in Core Social Skills® program has enjoyed great success helping participants grow their confidence and skills in social interaction. We are now pleased to offer it in three locations, as well as a summer program!

Overview of Topics

- 1. Understanding Social Skills Deficits**
 - The different types of social skill difficulties students may have and why they may act a certain way with peers.
- 2. Social skills that are important for students to learn**
 - Social cognition concepts as a foundation to building and increasing our awareness of the key **Social Skills** students need to understand (there's more to it than manners!).
- 3. How teachers and others working with students can help**
 - Increasing your ability to intervene and coach effectively by adopting a *coaching perspective* with all students.
 - Integrating **Training in Core Social Skills®** concepts and language into your daily interactions with students!
 - Using specific coaching techniques to foster confidence, assertiveness and collaboration in students in their social interactions.
 - Embedding coaching into your daily student interactions.
 - Facilitating safe and guided practice opportunities.
 - Using strategies to help your students integrate social skills into their behaviour, as well as generalize them to other environments.
